

# INSTALLATION AND OPERATION MAINTENANCE

# FRYERS OWNER'S MANUAL Models: BPF-3540, BPF-4050, BP-6575

**FOR YOUR SAFETY:** Do not store or use gasoline or other flammable vapors or liquids in the vicinity of this or any other appliance.

**WARNING:** Improper installation, adjustment, alteration, service or maintenance can cause property damage, injury or death. Read the installation, operating and maintenance instructions thoroughly before installing or servicing this equipment.

Instruction to be followed in the event the user smells gas shall be posted in a prominent location. This information shall be obtained by consulting the local gas supplier.

#### PLEASE RETAIN THIS MANUAL FOR FUTURE REFERENCES.

This equipment is design engineered for commercial use only.

P/N 300291 05/11

#### **IMPORTANT**

# **Installing, Operating and Service Personnel:**

- Installation of the equipment should be performed by qualified, certified, licensed and/or authorized personnel who are familiar with and experienced in state/local installation codes.
- Operation of the equipment should be performed by qualified or authorized personnel who have read this manual and are familiar with the functions of the equipment.
- Service of the equipment should be performed by qualified personnel who are knowledgeable with Bakers Pride equipment.

# SHIPPING DAMAGE CLAIM PROCEDURE

The equipment is inspected & crated carefully by skilled personnel before leaving factory. The transportation company assumes full responsibility for safe delivery upon acceptance of this equipment. If shipment arrives damaged:

- 1. **Visible loss or damage:** Note on freight bill or express delivery and have signed by the person making delivery.
- 2. File claim for damages immediately: Regardless of the extent of damages.
- 3. **Concealed loss or damage:** If damage is noticed after unpacking, notify the transportation company immediately and file 'Concealed Damage' claim with the transportation carrier. This should be done within fifteen (15) days from the date delivery and receipt of goods. Retain container for inspection.

#### INSTALLATION INSTRUCTIONS

The area around the appliance must be kept free and clear of combustibles such as solvents, cleaning liquid, broom, rags, etc.

Proper clearances must be provided at the front of the appliance for servicing and proper operation.

Provisions shall be incorporated in the design of the kitchen, to ensure adequate supply of fresh air and adequate clearance for air openings into the combustion chamber, for proper combustion, and ventilation.

For proper operation of the appliance, do not obstruct the flow of combustion and ventilation air.

The installation must conform with local codes, or in the absence of local codes, with the national fuel gas code, ANSI Z223.1 - 1988 (or latest addenda), National gas installation code, CAN/CGA - B 149.1, or the propane installation code, CAN/CGA - B 149.2 as applicable.

The appliance and its individual shut off valve must be disconnected from the gas supply piping system during any pressure testing of that system in excess of ½ PSI.

The appliance must be isolated from the gas supply piping system by closing its individual manual shut off valve during any pressure testing of the gas supply piping system at test pressures equal to or less than ½ PSI.

The gas supply line must be at least the same size as the gas inlet of the appliance.

#### **CLEARANCES**

|       | Non-combustible | Combustible |
|-------|-----------------|-------------|
| Sides | 6"              | 0"          |
| Rear  | 6"              | 0"          |
| Floor | 6"              | 0"          |

Installation on non-combustible floor shall be with factory supplied legs or casters.

# **OPERATING INSTRUCTIONS**

#### WARNING

Hot oil and hot surfaces can cause severe burns. Use caution when operating the fryer.

Do not attempt to move the fryer filled with hot oil or shortening.

Do not go near the area directly above the flue when fryer is in operation. Severe burns may be caused.

Drain hot oil in metal containers, do not use plastic buckets or glass containers.

#### LIGHTING INSTRUCTIONS

- 1. Set the thermostat and the gas cock dial on the combination gas valve to the "OFF" position.
- 2. Wait for five minutes.
- 3. Turn gas cock dial on the combination gas valve to "Pilot" position.
- 4. Depress the gas cock dial and apply a lighted match or taper to the pilot.
- 5. Hold the gas cock dial depressed for about 30 seconds or until pilot stays lit before releasing.
- 6. If the pilot does not stay lit, repeat step **4 and 5**.

#### **BURNERS / THERMOSTAT OPERATION**

- 1. After the pilot is lit, turn the gas cock dial to "ON" position.
- 2. Turn the thermostat dial to any temperature setting and observe the burners ignition. It should ignite within four seconds.

**CAUTION:** Main burners shall not be "ON" when the vessel is empty. During testing, fill the vessel with liquid (oil or water) till above the heat transfer tubes.

#### FLEXIBLE COUPLINGS, CONNECTORS AND CASTERS

If the unit is to be installed with casters, the installation shall be made with a connector that complies with the Standard for *Connectors for Movable Gas Appliances, ANSI Z21.69 or Connectors for Movable Gas Appliances, CAN/CGA-6.16,* and a quick-disconnect device that complies with the Standard for *Quick-Disconnect Devices for Use With Gas Fuel, ANSI Z21.41, or Quick Disconnect Devices for Use with Gas Fuel CAN1-6.9.* Locking front casters are provided to limit the movement of the appliance without depending on the connector or associated piping. A suitable strain relief must be installed with the flexible connector.

Restraining device may be attached to the back frame/panel of the unit.

All connections must be sealed with a joint compound suitable for LP gas and all connections must be tested with a soapy water solution before lighting pilots.

#### PREPARATION FOR USE

New units have a coating of oil on the interior of the vessel. Remove this coating with hot soapy water, washing soda, or any other grease dissolving liquid. Rinse thoroughly and drain until all residues are removed. Wipe dry.

Clean the baskets, crumb screen.

#### **PILOT OPERATION**

Check and make sure the pilot is lit. If not, refer to previous section for lighting the pilot.

#### BEFORE TURNING THE BURNERS ON

- 1. Fill the vessel with liquid shortening or oil up to the "oil level" marking.
- 2. Block of solid shortening should not be melted by setting it on top of tubes. This will damage the vessel and scorch fat. Either melt it first on another appliance or cut into small pieces and pack tightly below, between and above the burner tubes, without leaving any air spaces around the tubes. Turn the burners "ON" for about 10 seconds and turn "OFF" for about a minute. Repeat this "ON-OFF" cycle until all the shortening is melted. If scorching occurs, lower the "ON" time.
- 3. Do not overfill the vessel.

#### MAIN BURNER OPERATION

After the vessel is filled with liquid shortening or oil, set the gas cock dial on the combination gas valve to the "ON" position.

Turn the thermostat to desired temperature setting.

#### **DAILY SHUT-DOWN**

At the end of the day, turn the gas cock dial on the combination gas valve and the thermostat to OFF position. Where applicable turn the power switch to OFF position. Filter the oil in all fryers.

# MAINTENANCE INSTRUCTIONS

#### **CLEANING**

For continued performance efficiency and longevity of your Fryer it is essential to carry out a good maintenance program.

#### **DAILY**

- 1. Remove and wash thoroughly all "loose" parts (basket hanger, baskets, crumb screen, etc.).
- 2. Wipe clean all exterior and interior accessible surfaces and parts.
- 3. Filter the liquid oil/shortening at the end of the day, replace if necessary. If fryer is under heavy use, filter more often during the day.

#### **WEEKLY**

- 1. Shut down the fryer by turning off the gas cock dial and power supply, where applicable.
- 2. Drain the fryer in a filter pan or steel container. Flush out sediments at the bottom of the vessel with liquid oil.
- 3. Close the drain valve and fill the vessel with a mixture of boil-out solution and water.
- 4. Relight the pilot and turn on the burners.
- 5. When the solution starts to boil, turn off the thermostat and let the vessel soak to soften the deposit and/or carbon spots. (Approximately 1 hour).
- 6. Drain off solution, scrub the insides with brush and rinse thoroughly.
- 7. Repeat the cleaning procedure, if necessary.
- 8. Wipe dry with soft towels and refill with clean oil/shortening.

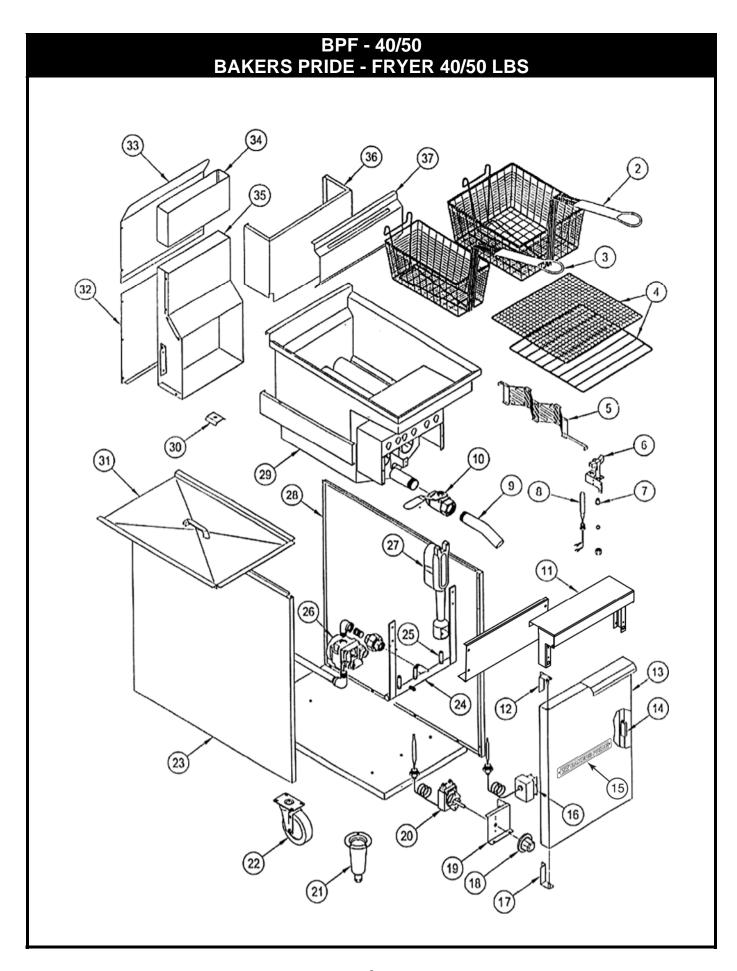

**WARNING:** All water must be removed before adding oil or shortening. Not doing so can result in splattering of hot oil.

#### STAINLESS STEEL PARTS

Do not use steel wool, abrasive cloths, cleansers or powders to clean stainless steel surfaces. All stainless steel parts should be wiped regularly with hot soapy water during the day and a stainless steel liquid cleaner at the end of the day. To remove encrusted materials, soak in hot water to loosen the material, and then use a wood or nylon scraper.

Contact the factory, factory representative or a local service company to perform maintenance and repairs.

# BAKERS PRIDE LIMITED WARRANTY

2205 S. Standard Avenue, Santa Ana, CA 92707 Phone: (714) 424-9380 w Fax:(714) 424-9385

WHAT IS COVERED

This warranty covers defects in material and workmanship under normal use, and applies only to the original purchaser providing that:

- The equipment has not been accidentally or intentionally damaged, altered or misused;
- The equipment is properly installed, adjusted, operated and maintained in accordance with National and local codes and in accordance with the installation instruction provided with the product;
- The serial number rating plate affixed to the equipment has not been defaced or removed.

WHO IS COVERED

This warranty is extended to the original purchaser and applies only to equipment purchased for use in the U.S.A.

COVERAGE PERIOD

Cyclone Convection Ovens: BCO Models: One (1) Year limited parts and labor; (1) Year limited door warranty. GDCO Models: Two (2) Year limited parts and labor; (2) Year limited door warranty.

CO11 Models: Two (2) Year limited parts and labor; (5) Year limited door warranty.

All Other Products: One (1) Year limited parts and labor. Warranty period begins the date of dealer invoice to customer or

ninety (90) days after shipment date from BAKERS PRIDE - whichever comes first.

WARRANTY COVERAGE This warranty covers on-site labor, parts and reasonable travel time and travel expenses of the authorized service representative up to (100) miles, round trip, and (2) hours travel time. The purchaser, however, shall be responsible for all expenses related to travel, including time, mileage and shipping expenses on smaller counter models that may be carried into a Factory Authorized Service Center, including the following models: PX-14, PX-16, P18, P22S, P24S, PD-4, PDC, WS Series and BK-18.

**EXCEPTIONS** 

All removable parts in BAKERS PRIDE Char-broilers, including but not limited to: Burners, Grates, Radiants, Stones and Valves, are covered for a period of SIX MONTHS. All Ceramic Baking Decks are covered for a period of THREE MONTHS. The installation of these replacement decks is the responsibility of the purchaser. The extended Cyclone door warranty years 3 through 5 is a parts only warranty and does not include labor, travel, milage or any other charges.

#### **EXCLUSIONS**

- · Negligence or acts of God,
- Thermostat calibrations after (30) days from equipment installation date,
- · Air and Gas adjustments,
- Light bulbs,
- Glass doors and door adjustments,
- Fuses,
- · Char-broiler work decks and cutting boards,
- Tightening of conveyor chains,
- Adjustments to burner flames and cleaning of pilot burners,
- Tightening of screws or fasteners.

- · Failures caused by erratic voltages or gas supplies,
- Unauthorized repair by anyone other than a BAKERS PRIDE Factory Authorized Service Center,
- · Damage in shipment,
- Alteration, misuse or improper installation,
- Thermostats and safety valves with broken capillary tubes,
- Accessories spatulas, forks, steak turners, grate lifters, oven brushes, scrapers, peels. etc.,
- Freight other than normal UPS charges,
- Ordinary wear and tear.

INSTALLATION

Leveling and installation of decks as well as proper installation and check out of all new equipment —per appropriate installation and use materials — is the responsibility of the dealer or installer, not the manufacturer.

REPLACEMENT PARTS

BAKERS PRIDE genuine Factory OEM parts receive a (90) day materials warranty effective from the date of installation by a BAKERS PRIDE Factory Authorized Service Center.

This Warranty is in lieu of all other warranties, expressed or implied, and all other obligations or liabilities on the manufacturer's part. BAKERS PRIDE shall in no event be liable for any special, indirect or consequential damages, or in any event for damages in excess of the purchase price of the unit. The repair or replacement of proven defective parts shall constitute a fulfillment of all obligations under the terms of this warranty.
